KEY FEATURES:

- ✓ Compatible with most HVAC systems
- ✓ High accuracy NTC thermistor element ($\pm 0.2^{\circ}\text{C}$ from 0°C to 70°C)
- ✓ Surface or conduit box mounting – no additional brackets required
- ✓ Flame-retardant ABS enclosure (VO rated)
- ✓ Optional setpoint version available (1–11k Ω range)
- ✓ Fast temperature response with ventilated housing

APPLICATIONS:

- Room temperature monitoring
- HVAC control systems
- Building automation
- Smart energy management

The **AX-TE-RT 10K3A1 NTC Thermistor** is a high-performance room temperature sensor, specifically engineered for compatibility with a wide range of HVAC control systems.

Designed for fast response and accuracy, it features a compact yet durable housing with integrated ventilation slots to ensure optimal airflow and temperature monitoring. Its high-quality NTC thermistor ensures precision readings, making it ideal for commercial and industrial applications where reliable environmental control is essential.

TECHNICAL SPECIFICATIONS

Sensor Type	NTC Thermistor (10K3A1)
Output	2-wire thermistor and PTC platinum variants available
Accuracy	Thermistor: $\pm 0.2^{\circ}\text{C}$ (0°C to 70°C) Platinum: $\pm 0.35^{\circ}\text{C}$ (0°C to 100°C)
Setpoint Output (Optional)	1 to 11k Ω
Material	VO Rated Flame-Retardant ABS
Terminals	Rising clamp, suitable for 0.5–1.5mm ² cable
Ambient Temperature Range	-10 $^{\circ}\text{C}$ to +60 $^{\circ}\text{C}$
Dimensions	85 x 85 x 26mm
Mounting	Direct surface or conduit box fixing
Country of Origin	United Kingdom

DIMENSIONS

Space Temperature Sensor

AX-TE-RT, 10K3A1 NTC Thermistor

INSTALLATION

The AX-TE-RT sensor should be installed by a suitably qualified technician in conjunction with any guidelines for the equipment which it is to be connected to. Field wiring should be installed to satisfy the requirements set out by the manufacturer of the equipment that the sensor is being connected to. As a general rule, screened cable should be used to connect the sensor to a BMS or other controller. Please note that none of the AX-TE-RT sensors are suitable for use with mains voltage. The AX-TE-RT is designed to be fixed directly to an internal wall using the lugs at the base of the housing. The type of fixing used will depend on the material that the sensor is being mounted on.

CONNECTIONS

Passive Sensors:

Passive sensors are polarity independent. Wires should be stripped and screwed into the two way terminal block in the main body of the sensor housing. Do not over-tighten the terminal screws as excessive force can cause damage to the terminal block and housing.

If screened cable is used, the shortest possible section of outer sheath should be removed to effect wiring. As there is no earth connection in the sensor, the screen must be connected to a functional earth elsewhere (often provided at the BMS or HVAC controller) in accordance with the instructions for the equipment that the AX-TE-RT is to be connected to.

Connections

- 1 Thermistor
- 1 Thermistor
- 3 Setpoint CW (-SP Version)
- 4 Setpoint wiper (-SP Version)
- 5 Setpoint CCW (-SP Version)

Trend sensor scaling

The following sensor scaling is for the AX-TE-RT passive sensor. If using SET to configure the controller, the AX-TE-RT has the same characteristics as a Trend Thermistor. If the sensor is being scaled manually the following information should be used for IQ2xx controllers with firmware v2.1 and above and IQ3 series controllers.

Sensor Type Module Settings

Set the sensor type scaling mode to 5 – characterise

Y = 1	11=2.641	O1=50
E=3	12=3.47	O2 = 40
U = 50	13=4.46	O3 = 30
L = - 5	14=6.66	O4 = 10
P = 6	15=7.668	O5=0
	16=8.102	O6=5

It is recommended that installation and maintenance of this equipment should be done with reference to the current edition of the I.E.T. regulations (BS7671) by suitably qualified/trained personnel. The regulations contain important requirements regarding the safety of electrical equipment. For International standards refer STANDARDS on D of C.
