KEY FEATURES:

- ✓ Seamless compatibility with the INFRESCO-VR range.
- ✓ Effortless remote adjustment of controller output.
- ✓ Compact and lightweight design for easy handling.
- ✓ Supplied with 2 AAA batteries for immediate use.

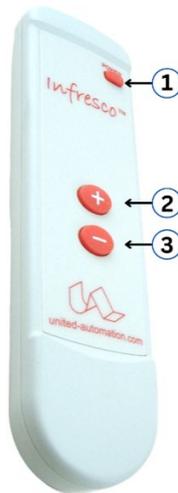

The Infresco VR-H Variable Remote Handset is a sleek and efficient remote control specifically designed for use with the INFRESCO-VR range of controllers. This handset allows users to conveniently adjust the output of the main controller from a distance, providing flexible and user-friendly operation. With this remote, the main controller can be installed in any convenient location, as long as it remains within sight of the VR-H for optimal performance.

Specifications:

- **Battery:** 2 x AAA (included)
- **Dimensions:** 160 x 45 x 20 mm
- **Weight:** 80g

HANDSET USE/FEATURES

1. Press to switch ON/OFF
2. (+) Setting 0 to F: Increase output with 10 output levels.
3. (-) Setting F to 0: Decrease output with 10 output levels.

APPLICATIONS:

Ideal for environments where the main controller is mounted out of easy reach, such as commercial heating systems, industrial spaces, or residential settings where remote control of heating elements is desired.

INFRESCO-VR Display functions

When display shows 't'	The Infresco is monitoring the ambient temperature and the ambient temperature remains above the trip level.
When display shows 'F'	The Infresco is set to full output.
When the Decimal Point 'flashes'	Transmitting from Remote hand set.
When the Decimal Point is 'on'	The Infresco is on standby.
