KEY FEATURES:

- ✓ **Food Safety:** Protective jackets minimise the risk of food contamination.
- ✓ **Impact Resistance:** Designed to withstand accidental bumps or knocks, ensuring reliable operation.
- ✓ **Preferred for Catering:** Widely used in food outlets, buffet counters, and serveries for added safety.

APPLICATIONS:

- Perfect for food counters, display warming, and heating solutions in commercial settings.

VARIANTS:

- **Double ended**
 - **Bare lamps:** Long life, Easy replacement.
 - **Jacketed lamps:** Better protection against potential food contamination, more resilient to impact breaks.
- **Hard glass single ended.**
 - **Clear or red glass:** Red filter version reduces visible light by 75%, Neck moulded to ensure caps will not come loose, 5000-hour life, Universal E27 cap.

Upgrade your catering equipment with high-performance **infrared lamps** designed for unparalleled efficiency and versatility. These lamps provide a clean, instant heat source, ideal for various applications within the catering and hospitality industries.

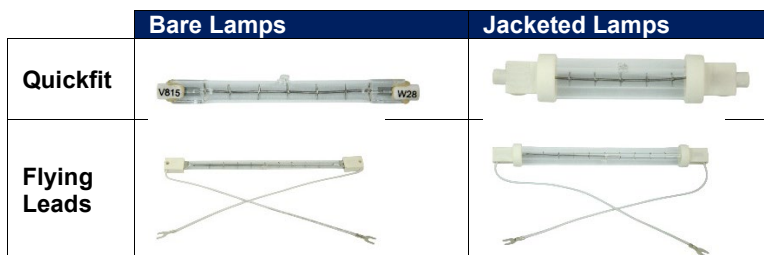

Infrared lamps are a cornerstone of the catering industry, offering a reliable, energy-efficient heat source. From heated counters to specialised food service setups, these lamps are built to ensure optimal performance.

Available in hard glass single-ended screw-in lamps and double-ended linear formats, these lamps are suitable for a range of catering equipment and custom installations.
