Infrared Heater Lamp with Speakers

2000W, 240V 2-in-1 Heater with Speakers

INSTALLATION

It comes with a wall-mounted bracket for a simple setup and includes a 1.9-meter power cord for convenient plug-in to any standard UK socket.

WARNING! Ensure the heater is at least 1m from any object, 500mm from the ceiling and 2400mm from floor level.

A wall mounting bracket is provided with the heater, which has been specifically designed to allow this product to be fitted to a wall or ceiling.

Before drilling for the bracket, check that the wall is solid and that there are no hidden water pipes or electric wires. The heater **must** be installed no less than 500 mm from side walls and no less than 2400 mm off the floor (Fig. 1)

WARNING! Ensure that the supply cable is well positioned and will not come into contact with the reflector of the heater or that it does not trail into the heated area, the supply cable can be fixed to the wall mounting bracket behind the heater with cable ties and then run flush along the wall. **The heater must be installed at least 2.4m above the floor.**

Do not touch the lamp bulb, as it may get damaged or have a shorter lifespan.

- In the event of heater failure, or for spare parts or advice, please contact the manufacture in the first instance.
- Disconnect from the mains before commencing any maintenance procedure including cleaning.
- To ensure optimum heat effectiveness, it is recommended that after the heater has been used for approximately 80-100 hours, that the guard and lamp are removed and the reflector is wiped with a lint-free cloth before reassembling.
- If the supply cord becomes damaged, it must be replaced by the manufacturer, its service agent or a similar qualified person.

(For more information, please refer to the user manual included in the box.)

The heater **must be mounted in a horizontal position.**

Vertical installation is not permitted.

LEGAL CERTIFICATE STANDARDS

The product is CE & ROHS marked, ensuring it meets European safety, health, and environmental protection standards.

RECOMMENDATIONS

NOTE: It is recommended that installation and maintenance of this equipment should be done with reference to the current edition of the I.E.T. (formerly I.E.E.) regulations (BS7671) by suitably qualified/trained personnel. The regulations contain important requirements regarding the installation and safety of electrical equipment. Specific installers should refer to local and national regulations.
