

X10260

VARIABLE AC VOLTAGE REGULATORS | SINGLE PHASE

FC11AL/2

From 25V to 230V

Universal Phase Angle Controller

KEY FEATURES:

- ✓ **Integral 26A Triac:**
Provides reliable and efficient power control with a robust 26A current rating.
- ✓ **Variable Phase Angle Control:** Enables precise adjustment of power delivery to the load through a wide range of control signal inputs, either voltage or current.
- ✓ **Selectable Soft-Start:**
Includes a soft-start delay function to protect sensitive loads and ensure smooth operation.
- ✓ **Status LED Indicator**
- ✓ **Low Power Consumption:**
Consumes less than 2 watts, making it an energy-efficient solution.
- ✓ **Wide Operational Voltage Range:** Supports AC line voltages from 25V to 230V at 50/60 Hz.

APPLICATIONS:

Ideal for a wide range of industrial and commercial applications, including:

- Industrial Ovens
- Restaurant and Hospitality
- Quartz and Heat Lamps
- Moulders and Dryers
- Inductive Loads

The **FC11AL/2** is a robust single-phase firing module designed with an integral 26A triac, delivering precise power control through variable phase angle modulation. This advanced controller is perfect for applications requiring smooth and adjustable power delivery, such as ovens, heat lamps, and various industrial processes. By controlling the AC supply, the FC11AL/2 effectively manages the power supplied to the load, ensuring optimal performance and energy efficiency.

The FC11AL/2 features a ramp and pedestal input circuit that allows for fine-tuned control of the firing phase angle via a DC signal, ensuring more power is delivered to the load as the angle increases. Its selectable soft-start function further enhances the control, making it suitable for a wide range of applications where gradual power ramp-up is critical.

TECHNICAL SPECIFICATIONS

Signal Span minimum	0-2V dc
Signal span maximum	0-25V dc
Signal zero offset	0-30% of span
Signal input resistance	5000 ohms \pm 20%
Manual potentiometer	2K, 5K or 10K
I ² t for fusing (10m sec)	250 A ² s
Soft start time constant	0.06 sec/microfarad
Isolation voltage	2500 Vrms
Max. Working temperature	65°C operational
AC input power (1 & 2)	18 to 24V ac @ 65mA
Auxiliary output (5)	5Vdc @ 5mA protected
Triac limiting RMS current	26A
AC line voltage +/- 10% @ 50/60 Hz	25V to 230V
Peak single cycle surge current	250A
Power consumption	1.7W
Max. Peak voltage	600V
Current rating	25A
Storage temperature	-20°C to +85°C

YOU MUST READ THIS BEFORE INSTALLATION

 ELECTRICAL SAFETY	 INSTALLATION REQUIREMENTS	 USER RESTRICTIONS	 USAGE ENVIRONMENT	 HOT SURFACE WARNING
WARNING: RISK OF ELECTRIC SHOCK Always consult the Installation & Maintenance Instructions before connecting this product to the power supply. WARNING: Disconnect Power Before Servicing Ensure the electrical supply is safely disconnected before connecting to any supply, load, or control terminals.	WARNING: Installation by Qualified Personnel Only This product must only be installed or fitted by a competent, qualified installer familiar with the relevant electrical standards and installation practices.	WARNING: Not for Use by Vulnerable Individuals This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they are supervised or instructed by a person responsible for their safety.	WARNING: Industrial Use Only This is an industrial-grade product and is not intended for household use.	WARNING: Hot Surfaces On certain models, surfaces marked with this symbol become hot during use. Avoid direct contact and follow all thermal safety precautions.

RECOMMENDATIONS

FUSING

It is recommended that semiconductor, fast-acting type fuses or circuit breakers (Semiconductor-MCB) be used for unit protection. On initial operation some loads may need an increased Factor of Safety (F of S) for unit and/or device protection. See the SRA datasheet for further information.

DOCUMENTS

Other documents available on request, which may be appropriate for your application:

Code	Identity	Description
X10229	RFI	Filter recommendations: Addressing the EMC Directive
X10213	ITA	Interaction: Uses for phase angle and for burst fire control
X10255	SRA	Safety Requirements: Addressing the Low Voltage Directive (LVD) including, Thermal Data/Cooling, Live Parts Warning, Earthing Requirements and Fusing Recommendations
P01.1	COS	UAL Conditions of Sale

It is recommended that installation and maintenance of this equipment should be done with reference to the current edition of the I.E.T. regulations (BS7671) by suitably qualified/trained personnel. The regulations contain important requirements regarding the safety of electrical equipment. For International standards refer STANDARDS on D of C.

OPTIONAL EXTRAS

Product Code	Product Description
A-EN2010-30-S	RFI Filter
T30201	Supply Transformer
Z01062	Heatsink Compound Syringe (Must be applied while fitting)
Note: When ordering a filter, the current at which the FC11AL/2 is to be used at will be required.
